Product Owner / Business Analyst

Description

We are looking for a Product Owner / Business Analyst with strong experience in the banking or financial domain (preferably payments).

This role involves managing the end-to-end product lifecycle, working closely with cross-functional teams, gathering requirements, and delivering high-quality product features in an Agile environment. The candidate should be able to bridge business and technical teams while driving product strategy and execution.

Responsibilities

- **Product Lifecycle Management:** Manage product lifecycle from ideation to post-launch, define product strategy aligned with business goals and Deliver products within timeline and budget
- **Stakeholder Collaboration :**Act as a liaison between business, engineering, QA, UX/UI, and sales teams , Conduct meetings to define product vision and priorities , Align teams on roadmap and OKRs
- **Requirements Gathering & Documentation:** Gather functional, technical, and non-functional requirements (NFRs), Create User Stories and Business Requirement Documents (BRD), Define workflows, business rules, and system integrations
- **Agile Delivery :**Work in Agile/Scrum environment: Track progress using velocity and burndown charts and Coordinate with teams for smooth feature delivery
- **Process Improvement & Analysis:** Analyse current (As-Is) and future (To-Be) processes, perform gap analysis and identify improvement areas, Design prototypes and document pain points
- **Product Development Support:** Collaborate with Product Managers and Architects for feature design, validate use cases and ensure quality releases and publish release notes and documentation
- **Training & Documentation:** Create user guides, best practices, and training materials and support knowledge transfer to stakeholders

Qualifications

- 8–10 years of experience in banking or financial industry
