.NET Developer

Description

At ANCORE, we foster a culture where our people come first. We refer to our employees as 'members' to emphasize that everyone who joins us becomes a co-owner in our journey—sharing both the rewards and challenges of building a world-class business. As one of the world's largest independent firms in information technology and business process services, our continued success hinges on attracting and retaining top-tier professionals like you.

Responsibilities

- Design and develop the Restful API Services and pub/sub message interfaces in alignment with integration requirements, defined architecture and design and infrastructure specifications. Leverage Azure APIM and Azure Service Bus.
 - Coordinate with QA team, fix the bug and stabilize the functionality.
 - Integrate the solution with DevSecOps and all the security hooks and controls.
 - Work with other ITS teams for taking the project the various steps from development and production.
- Complete the documentation of modules that will be developed.

Qualifications

- Experience of more than 8 years in application development, specially in middle-tier and back-end development of services, application logic, APIs, etc.
- Strong skills and experience in system development, especially in .Net and Azure Cloud.
- Experience with API Gateways, Message / Event hubs, Azure DevOps, SharePoint Online and Azure Key Vault
- Knowledge in the development of application standards, architecture products, artifacts, and standardization processes
- Excellent communication, writing, documentation and facilitation skills
- Ability to juggle multiple tasks in a fast-paced environment.
- Ability to provide training, coaching support for architecture projects Ability to visualize and create high-level models (rigorous information-rich diagrams), ability to extend and mature the business architecture Exceptional communication skills and ability to communicate appropriately at all levels of the organization (this includes written and verbal communications, as well as visualizations) Ability to act as liaison conveying information in suitably accurate models between the business unit and their counterparts within Information Technology
- Proven conceptual, analytical, and judgmental skills
- Ability to work directly with clients and management without supervision and to facilitate and navigate discussions with stakeholders to ensure clarity, prioritization, and consensus.

Education

Bachelor's degree in computer science, Information Technology, Software Engineering, Database Management or Certification in programming

comprehensive Medical, Dental, and Vision Insurance, and a robust 401(k) plan. But we don't stop there.

We invest in your potential:

Every member receives a dedicated stipend to pursue professional development—be it certifications, a master's degree, or even a doctorate. We encourage growth through flexible learning options, whether you're taking a course, earning a certification, or attending a conference. Curiosity is celebrated here, and continuous learning is a cornerstone of our culture.

We work hard—and make time for joy:

Ancore, fun isn't an afterthought. From virtual and in-person events like happy hours, holiday parties, and wellness challenges to annual celebrations and charity galas, we believe in fostering connection, creativity, and community spirit.

Diversity is our strength:

As an Affirmative Action/Equal Opportunity employer, Ancore makes all employment decisions based on merit, qualifications, and business needs—never on personal attributes or backgrounds. Everyone deserves a workplace where they feel valued and respected.

Access for all:

We are committed to inclusion and provide reasonable accommodations to ensure all qualified individuals with disabilities can thrive in their roles.
