QA Analyst and Automation Specialist

Description

We are seeking an experienced QA Analyst and Automation Specialist with strong expertise in testing D2L (Desire2Learn), Curriculum & Catalog Management Systems (CCMS), and integrations with PeopleSoft (PSFT). The role involves functional, integration, and end-to-end testing along with maintaining automation frameworks and developing scalable automation scripts using Playwright and Postman.

The ideal candidate should have strong automation testing experience, knowledge of API and integration testing, and experience working in Agile environments.

Responsibilities

- Collaborate with business analysts, developers, and stakeholders to understand requirements and create test cases.
- Maintain and enhance automation frameworks for functional and regression testing.
- Develop, execute, and maintain Playwright automation scripts for UI and API testing.
- Perform functional, integration, and end-to-end testing for D2L, CCMS, and PSFT integrations.
- Identify, track, and resolve software defects with development teams.
- Create and maintain detailed test plans, test cases, and test results documentation.
- Improve QA processes, automation strategies, and testing standards.
- Ensure QA Standard Operating Procedures are followed.
- Participate in Agile ceremonies such as sprint planning, reviews, and retrospectives.
- Maintain CI/CD pipelines, repositories, and scalable automation suites.

Qualifications

- Minimum 8 years of automation testing experience.
- Strong experience testing: D2L (Desire2Learn), Curriculum & Catalog Management Systems (CCMS) and PeopleSoft Campus Solutions (PSFT)
- Strong expertise in Playwright automation using TypeScript.
- Experience with Postman for API automation testing.
- Strong knowledge of functional, integration, and API testing methodologies.
- Experience testing REST APIs and MuleSoft-based services.
- Experience maintaining CI/CD pipelines and automation repositories.
- Experience with defect tracking and test management tools.
- Ability to analyse requirements and create detailed test cases.
- Experience working in Agile development environments.
- Proficiency with GitHub Copilot for automation scripting.
- Strong problem-solving, communication, and multitasking skills.

Job Benefits

We offer more than just a job—we offer a community:

At Ancore, we provide exceptional benefits, including competitive Paid Time Off, comprehensive Medical, Dental, and Vision Insurance, and a robust 401(k) plan. But we don't stop there.

We invest in your potential:

Every member receives a dedicated stipend to pursue professional development—be it certifications, a master's degree, or even a doctorate. We encourage growth through flexible learning options, whether you're taking a course, earning a certification, or attending a conference. Curiosity is celebrated here, and continuous learning is a cornerstone of our culture.

We work hard—and make time for joy:

Ancore, fun isn't an afterthought. From virtual and in-person events like happy hours, holiday parties, and wellness challenges to annual celebrations and charity galas, we believe in fostering connection, creativity, and community spirit.

Diversity is our strength:

As an Affirmative Action/Equal Opportunity employer, Ancore makes all employment decisions based on merit, qualifications, and business needs—never on personal attributes or backgrounds. Everyone deserves a workplace where they feel valued and respected.

Access for all:

We are committed to inclusion and providing reasonable accommodation to ensure all qualified individuals with disabilities can thrive in their roles.
