Senior Business Analyst

Description

The Senior Business Analyst plays a pivotal role within our organization, acting as a bridge between business needs and technological solutions. This position is responsible for the collection and definition of requirements, collaborating with cross-functional teams to deliver effective solutions. The role requires strong analytical, communication, and problem-solving skills to drive successful project outcomes.

Responsibilities

- Collaborating with business leaders to pose inquiries and clarify requirements while ensuring alignment with organizational goals and requirements when reviewing technology solutions.
- Reviewing contracts for technical implications.
- Completing exception and pre-approval documents as required.
- Working with stakeholders and technical teams to craft effective solutions addressing business needs, including creating detailed functional specifications and use cases.
- Acting as a liaison between business stakeholders and technical teams to ensure clear communication and understanding of requirements.
- Staying up to date on industry trends, best practices, and emerging technologies to propose innovative solutions and enhance business processes.

Qualifications

- A bachelor's degree in business administration, information technology, or a related field.
- Certification in Business Analysis (e.g., CBAP, CCBA) is desirable.

General Experience:

- Exceptional communication and interpersonal skills.
- The ability to collaborate effectively in cross-functional teams and manage multiple stakeholders.

*Specialized Experience:

- A minimum of 7-10 years of experience as a Business Analyst.
- Profound knowledge of business analysis methodologies, tools, and techniques.
